2. Operations continue on debris removal from the North Tower area with intermittent use of multiversal to cool debris.
3. DSNY continues to remove food from area restaurants and on site.
4. Tower Ladder continues to operate on 2 WTC debris and multiversal 7 WTC.
5. Multiversal set up between buildings 5 and 6 with 3 ½" supply line and permanent spare pumper.
6. Con Edison energized steam lines on Church and Greenwich.
7. IS 89 cache is closed.

PLANNED ACTIONS (Next 24 hours)

1. 700-Ton crane is in place on West St. Accelerated debris removal and void search operations will continue in the North Tower area. FDNY SOC and PD ESU personnel have been assigned to this location.
2. 1000-ton crane is in place on West Street in the proximity of the Marriott WTC Hotel. 300-ton crane is also assisting in this operation.
3. Steel cutting operations and subsequent removal of debris by rigging and heavy equipment will continue. Ironworkers are to be utilized to accomplish this mission. FDNY SOC and PD ESU personnel will be utilized to assist and supplement this function. All available cutting set-ups should be utilized on a continual basis as conditions permit.
4. FD SOC personnel and PD ESU personnel will continue to conduct void searches as required as heavy steel is removed.
5. All Emergency personnel operating on the South Tower will be in bunker pants due to the high heat level.
6. Continue to place and use large caliber water streams for continuous fire extinguishment operations on 1 and 2 WTC as required. Place and use protective hand lines elsewhere as needed.
7. Continue to review operational/engineering plan to facilitate removal of the West façade walls still standing in the South Tower area. FDNY, DDC and site construction manager to review plan and evaluate results of deconstruction process.
8. Continue GPS mapping and documentation of recovery operations and structural features.

WTC COMMAND

TO: Operations Chiefs, Sector Chiefs, Company Commanders of E. 10/L.10

FROM: Frank Cruthers WCT Task Force Commander

DATE: 10/5/01

SUBJECT: GSP Tracking (Revised)

1. GPS tracking is now fully implemented. When a fire officer, firefighter, police officer, civilian, fire apparatus or firefighter's gear, equipment or personal items are recovered the Sector Chief will call over the HT on Channel 5 for GPS Tracking. E.10/L.10 will acknowledge the call and respond to the location to take readings. Two teams will *always* be in the field.
2. Fire Officer, Firefighters, Police officer and Civilian Recovery:
 - 2.1. *The Sector Chief will notify the Operation Posts of every fire personnel recovery.* The Operations Post will immediately notify the Command Post by phone.
 - 2.2. All recovery of victims and remains must be tagged with a special NYPD identification tag that includes a FDNY bar code.
 - 2.3. The GPS team will take a position reading, scan the bar code, then write on the bottom half of the tag the grid, and position readings. The top of the tag will include the grid number, and the name and agency of the person who found the body.
 - 2.3.1. If a construction worker brings over remains to a Sector, the Chief will arrange to get a GPS position. If that is not possible due to safety reasons the grid will be recorded in a special *GPS Not Available Log* by the GPS Tracking team. In any case the GPS team must tag all victims and remains.
 - 2.4. The bottom half of the tag is given to the Sector Chief to record in their log.
 - 2.5. The tag number will be recorded at the temporary morgue. If there is no tag, the FM or EMS will contact the Sector Chief immediately to make sure the GPS team tags the victim.
 - 2.6. Fire Marshals will ensure that the tag number is recorded at the Medical Examiner's Office. When the Medical Examiner identifies the victim, the tag number and identity of the victim will be phoned to the Command Post (after notification to the family.) 646-613-0078 or 1757. The Planning Chief will record this information into a database. This information will be used to map the location of where all fire personnel are found.
3. Firefighting gear, equipment and apparatus or other items:
 - 3.1. When discovering gear, equipment and apparatus or other items the GPS tracking team will follow a similar documenting procedure as above. Positioning reads, grid location and tagging is done by the GPS team.
4. Any questions or suggestion should be directed to BC Joseph Pfeifer (Planning Chief) at 646-613-0228 or 908-872-7220 (cell).

Assistant Chief Frank Cruthers

SAFETY IS AN ATTITUDE

EVACUATION SIGNAL = 3 Blasts – Stop all work and evacuate the area

USE YOUR PPE IN THE GREEN ZONE:

- ! Hardhat or helmet
- ! Respirator with replaceable P100 organic vapor/acid cartridges. Replace filter when passage of air becomes difficult or at least at the beginning of each shift. Store cartridges in sealed container until ready for use.
- ! Steel toed boots or equivalent
- ! Coveralls or a long sleeve shirt
- ! Safety glasses with side shield/face shield or goggles
- ! Leather gloves with latex or nitrile liners

Each Sector Command MUST Assign a Safety Officer

Each Sector Command MUST Assign a FAST Truck for Emergency Response

Hazards: Look up, Look down, Look around and proceed with CAUTION

- *TRAFFIC WITHIN AND AROUND THE SITE** – *The area is becoming more of a thoroughfare than a pedestrian walkway. DRIVERS please slow down, it may save someone else's life!*
- *Falling glass and other debris** - *Increased awareness, especially during rain and wind events;*
- *Demolition operations** - *Red barrier tape identifies the site. Access only for authorized personnel;*
- *Crane operations** - *Be aware of swing & stress cables and whipping of broken cables;*
- *Walking and/or working surfaces** - *Especially hazardous when wet;*
- *Airborne contaminants** - *Proper use of PPE can eliminate or at least reduce the potential hazard;*
- *Biological Hazards** - *Utilize Universal Precautions;*
- *Cutting and welding = compressed gasses** – *Treat all cylinders as pressurized and volatile;*
- *Fast moving vehicles, backing vehicles, excavation equipment, swinging booms/loads on cranes** – *Maintain site awareness at all times;*
- *Sewer grates, trenches, manholes** – *Possible collapse under heavy equipment or a vector for the release of toxic gas/acid vapors. Avoid whenever possible;*

Recommendations for your SURVIVAL:

- ☛ Use all PPE at all times on the site, even on the perimeter of the Green Zone
- ☛ Establish emergency communications
- ☛ Know the location of damaged buildings and their changing conditions
- ☛ Plan for emergency events – know your escape routes
- ☛ Be AWARE of changing conditions
- ☛ Maintain visual contact with your partner(s)
- ☛ All cylinders are charged and ammunition live – treat with caution
- ☛ Climb with proper personal protective equipment at all times
- ☛ Do not eat or smoke in the work zone
- ☛ Decontaminate prior to entering established eating facilities and after your shift
